More power to the Core.

Now EN50131 Grade 3 certified.

ABSOLUTA is a testament to Bentel Security's commitment to perfection. Bentel Security continues to persevere -- using emerging technologies to meet ever-changing customer needs.

The ABSOLUTA platform is a perfect example of this evolution, drawing from the legacy of experience of the Bentel Security brand to attain a new level of perfection. Rooted in Italian quality and design, the ABSOLUTA exudes a passion for the finer details – those that make all the difference to today's demanding customer.

Features that make a Difference.

Simple yet Powerful User Interfaces

- Up to 16 Touch screen keypads for user friendly operation
- Up to 32 Proximity readers for tags and keys (up to 250) for operating without having to remember PINs
- Up to 16 LCD Keypad for User and Installer operation

Complete System Remote Control

- Voice menu for controlling the panel remotely
- "Talk and listen" remotely using the AS100 accessory
- SMS remote control: arm, disarm, activate outputs remotely using SMS*
- User APP (IOS and Android) to remote control the panel * **

New Home Automation Horizons

- Powerful event-action engine to drive actions (output, call, SMS*, e-mails**) from every event registered on the panel
- Up to 50 fully programmable outputs: polarity, timing, oscillation and event triggers
- All the input zones of the panel can be used as input for controlling home automation features
- Powerful scheduler to define up to 8 automatic arming/disarming sequences during the day for each single partition
- 20 different timers with 8 activations per day

- Voice communicator with messages for each event/zone and fully customizable library of audio messages
- Digital communicator supporting CID and SIA both on PSTN line and GSM*
- GPRS*/IP** communication with Sur-Gard receivers
- 32 Numbers Phone book with black and white list
- SMS* or e-mail** available for each event

360° Programming

- Powerful Bentel Operating Security Software (BOSS) for the full programming of the panel
- BOSS local connection with USB port or remotely on GPRS* or IP** channels
- Option to load the programming using a USB Stick
- Keypad programming for the basic operations

and much more...

- EN Grade 2/EN Grade 3 Certification
- Up to 104 zones with logical assignment to the physical zones
- Up to 32 wireless zones using the VRX32 wireless receiver**
- Full partition management (up to 16)
- Event logger for up to 2000 events
- 9 Languages available on the panel
- USB Firmware Upgrade

* Feature available with ABS-GSM optional board

** Feature available with ABS-IP optional board

*** For non Grade 3 wireless subsystems

► Being a team to be Successful.

Preparing for the future is no foreign concept to the research and development team at Bentel Security. For this reason, ABSOLUTA also supports ITV2, a third party integration protocol, allowing for endless opportunities to enhance and maximize the systems' capabilities.

► Going above and Beyond.

With ABSOLUTA security without compromise is a forgiven. ABSOLUTA offers real-time connection, opening the panel up to the interactive world of smart home management.

Equipped with an ABS-GSM board, the ABSOLUTA panel also conveniently allows for remotely controlled activations via SMS as well as self-monitoring features

through highly intuitive user interfaces. With BOSS programming software, installers are now empowered to program the panel to build up on automation features. In fact, the powerful BOSS event/actions matrix allows for complex home automation scenarios, delivering a truly unique user experience.

It's all about Control.

Offering a feature-rich platform is a key goal, but at Bentel Security the ultimate success is measured by how easily both installers and users can benefit from improvements to the system. The styling, design and functionality of the new ABSOLUTA user App is inspired by the most current trends in the market, making it extremely easy for all to capitalize on the system's impressive enhancements. The ABSOLUTA App is available for Apple iOS and Android. Through the real-time ABS-IP board, connection is immediate, as soon as the App is launched.

Real-time notifications (PUSH notifications) are available via SMS and e-mail for a number of events. In the absence of IP or GPRS connection, the panel can readily handle SMS commands.

The M-Touch 7" colour touchscreen keypad offers easy additional control over the system. The M-Touch was designed based on specific installers' and users' needs to offer fast and simple system management. With an extremely intuitive menu, even complex actions and scenarios in home automation can be programmed with ease.

Designed with Italian quality and craftsmanship, the M-Touch blends unobtrusively in to any décor.
