

KMC20

Wireless Vanishing Door / Window Contact

Installs in Seconds and Virtually Vanishes

By far the smallest wireless door/window contact currently available in the world, the wafer-thin profile of the KMC20 provides a streamlined, practically non-existent look once installed. The contact can be easily mounted to a window frame with double-sided tape, eliminating the need for drilling. This not only reduces installation times but also retains the integrity of window warranties. A generous magnet gap of 16 mm (5/8") easily accommodates larger door or window frames. The KMC20 is built with reliable 868 MHz technology, is powered by a replaceable lithium battery, and is compatible with all 868 MHz Bentel wireless receivers.

Product Features:

- Wafer-thin profile
- Long-life lithium battery included
- 16 mm (5/8") maximum magnet gap
- Double-sided tape (included)
- Smooth-back plastics
- Reliable 868 MHz technology
- CE listed
- RoHS compliant

KMC20

Wireless Vanishing Door / Window Contact

Value Added

Significantly smaller than competitor door/window contacts, the KMC20 is housed within a compact casing that allows it to be used for the tightest-fitting installations. Once installed, the contact is inconspicuous and complements the décor of most homes. It is built with reliable 868 MHz technology, uses a long-life lithium battery and is compatible with all current Bentel wireless receivers
